OMC V2.1

Pulse valve controller for jet pulse dust collector. Cleaning on timed basis.

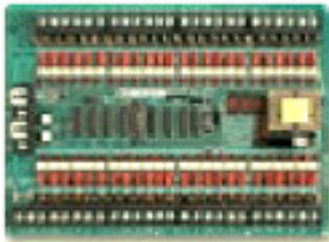

OMC EX1.0

10 outputs additional card

PA V1.1-1

Use together with OMC V2.1 for cleaning on basis of high and low pressure limits. Measure different pressure and display in Digital which can be displayed pressure units in term of mm H2O, Pa, kPa.

Digital timer

is designed to control the frequency and duration of the cleaning pulse in a reverse Pulse Filter. It does this by providing a timed sequential signal to the pilot solenoid valve.
